

Banking

Multicurrency IBAN's

Send and receive payments locally and internationally with ease. Benefit from having access to 50+ currencies including GBP, EUR, USD, CHF, AED, HKD. These features facilitate easy management of global transactions without the need for multiple bank accounts in different countries. Having a bank account that acts as a central platform to manage international payments can give you an advantage over your competitors.

Payment Rails

Access international payment rails including SWIFT, as well as local payment channels such as SEPA, FPS, ACH and more. With these capabilities you will have multiple payment options at a low cost. These rails ensure that your business can efficiently send and receive payments worldwide, improving operational efficiency. Moreover, this diversity offers the flexibility to choose cost-effective and timely methods for each transaction.

Named IBANs

Dedicated business account in your company name supporting 50+ currencies including GBP, EUR, USD, CHF, AED and more. Each account comes with a unique IBAN and SWIFT code allowing your business to streamline the process of conducting transactions internationally.

Foreign Exchange

Currency exchange services on-the-go via desktop or mobile banking, allowing you to convert multiple currencies at competitive rates. Exchange currencies at any time and respond to currency market fluctuations with speed, protecting your business from adverse currency movements.

Offshore Companies

Banking for clients in offshore jurisdictions, tier-1 banking providers that support companies in high-risk countries. We assist clients from all jurisdictions such as Europe, Asia, South America, Africa and the Middle East. High-risk countries we serve include Hong Kong, UAE, Seychelles, Bahamas, Cayman Islands and many more. With our comprehensive solutions businesses in complex regulatory environments can access top-tier banking services.

High-Risk Industries

Solutions for clients operating in high-risk industries such as gambling, crypto-funds, dating and more. Our offers are designed to support financial operations of businesses from all industries globally. We ensure that high-risk businesses have access to banking services that understand their specific challenges and needs. This approach helps mitigate the risks associated with operating in high-risk sectors.

Merchant Accounts

Online retailers can take advantage of merchant settlement accounts, transfer revenue generated through your payment processors to your secure bank account. These accounts offer enhanced security features and fraud protection, safeguarding your transactions and customer information, which is vital for maintaining trust in the online retail space.

Online Platform

Oversee your finances 24/7 via mobile application or desktop. View your balance held in multiple currencies, make transactions, and manage payments at any time. Additionally, the ability to set up notifications for account activities allows you to stay informed of your financial status in real-time.

Payment Service Providers (PSPs)

Multi-Currency Processing

Expand your local or online business by accepting payments in multiple currencies. Allow your customers pay using their preferred currency and payment type at checkout, including all major card schemes (Visa, Mastercard, American Express, PayPal). This not only enhances the customer experience by providing flexibility and convenience but also expands your market reach and potential for increased sales. Multi-currency processing reduces currency conversion hassles for customers, making your products and services more attractive to an international audience.

Global Payment Gateways

Offer your customers various payment methods from debit cards, credit cards and crypto processing. Accept payments globally and expand your business. By integrating global payment gateways you cater to a wider audience, regardless of their preferred payment method or geographical location. This will lead to higher conversion rates as customers are more likely to complete purchases when they can use their preferred payment option.

Lower Processing Costs

Utilise smart routing and cost-effective payment methods, saving you money on each transaction. By leveraging the capabilities of PSPs to route transactions through the most cost-effective networks, your business will significantly reduce payment processing fees. This approach lowers operational costs and allows for more competitive pricing for customers. Adopting these strategies can lead to substantial savings over time and increase sales volumes.

Safe & Secure

PSP's prioritise security of funds by implementing advanced encryption and other security measures to protect customer and payment data. Ensure fraud detection and prevention to minimise fraudulent transactions. Our partners use a variety of tools, including tokenisation, secure socket layer (SSL) encryption, and compliance with Payment Card Industry Data Security Standards (PCI DSS), to safeguard sensitive information. Additionally, they employ sophisticated algorithms and machine learning techniques to detect and prevent fraudulent activity in real-time.

Offshore Companies

Payment processing solutions for clients in offshore jurisdictions. We assist clients from all jurisdictions such as Europe, Asia, South America, Africa, and the Middle East. High-risk countries we serve include Hong Kong, UAE, Seychelles, Bahamas, Cayman Islands and many more. With our comprehensive solutions businesses in high-risk jurisdictions can access payment processing services.

High-Risk Industries

Solutions for clients operating in high-risk industries such as gambling, pharmaceuticals, dating and more. Our offers are designed to support financial operations of businesses from all industries globally. We ensure that these businesses have access to payment processors that understand their specific challenges and needs. This approach helps mitigate the risks associated with operating in high-risk sectors.

Cryptocurrency OTC

Digital Asset Remittance

By leveraging blockchain technology, bypass traditional banking intermediaries and reduce transaction times from days to minutes. Benefit from a seamless, fast, and cost-effective solution for transferring funds globally. This efficiency not only accelerates the flow of business operations but also cuts down on the fees associated with international money transfers. Furthermore, the transparency and security provided by digital asset transactions ensure that businesses can track their funds in real-time.

Deep Liquidity

Access deep liquidity pools and execute large orders without impacting market price by trading off the public order book. Get highly competitive quotes for trades and execute without causing volatility in the market. Deep liquidity not only facilitates the execution of large trades at optimal prices but also ensures that these transactions can be completed swiftly.

Named IBANs

Receive your own named IBAN account in your company name, wire fiat payments directly to the IBAN account. Vice-versa, receive your converted crypto into that bank account for a more private conversion. This unique feature provides a seamless bridge between traditional banking and the world of digital assets, making it easier for your business to operate in both spaces efficiently.

Competitive Pricing

Trade with competitive quotes and avoid price slippage when placing large volume orders. Competitive pricing structures are crucial for clients who operate with high volumes, as even slight differences in price can significantly impact the overall transaction cost. By utilising tight spreads you'll minimise unnecessary costs.

Customised Solutions

Trade via a user-friendly platform or directly on chat systems with the trading desk for a more personalised experience. These tailored trading solutions cater to the specific needs and preferences of clients by offering more flexibility. Enjoy a trading experience that is optimised for your unique requirements.

Regulated Cryptocurrency Services

Benefit from a compliant and regulated cryptocurrency environment, ensuring that your funds are safe and secure. In a landscape that is often scrutinised for its regulatory challenges, having access to regulated cryptocurrency services signifies a commitment to transparency, security, and reliability.

Offshore Companies

Digital asset remittance for clients in offshore jurisdictions, regulated crypto firms that support companies in high-risk countries. This is particularly beneficial in regions where the regulatory environment is uncertain or where financial services are heavily monitored. We assist clients from all jurisdictions such as Europe, Asia, South America, Africa, and the Middle East. High-risk countries we serve include Hong Kong, UAE, Seychelles, Bahamas, Cayman Islands and many more.

High-Risk Industries

Crypto solutions for clients operating in high-risk industries such as gambling, crypto funds, asset managers and more. This personalised service and privacy offered by OTC desks are particularly valuable for these industries, where the need to move large amounts of capital quickly and discreetly is often a key operational requirement.

Licensing & Regulation

Regulatory Approval

Be guided through the complex process of obtaining regulatory approval. Receive support with documentation and communication with regulatory authorities. Management of regulatory approval processes significantly accelerates your time to market. Furthermore, expert guidance will help you understand the specific regulatory requirements and compliance standards of your industry, reducing the risk of costly mistakes and oversights.

Sourcing Licences

By leveraging our extensive connections, we can assist you by sourcing the right licences that match your businesses requirements. This process not only saves time and resources but also ensures that the licences obtained are perfectly aligned with your business goals and operational needs.

Purchasing Licences

After sourcing the required licence, we can support with the purchase. We'll ensure that you acquire the necessary licence legally and efficiently. Our involvement can help negotiate better terms as we understand the value of each licence, allowing you to save on costs. This end-to-end service minimises the administrative burden on your team, enabling you to focus on core business activities with the confidence that licensing requirements are managed by expert lawyers.

Multiple Jurisdictions

A broad range of knowledge and experience across multiple jurisdictions, making it easier to navigate the complexities of different regulatory environments. This expertise is valuable for businesses looking to expand internationally or operate in multiple countries, as it helps to ensure compliance with local laws and regulations in each territory. Leverage our network to facilitate a cohesive and compliant expansion strategy, ensuring that your business thrives in diverse legal landscapes.

More Services

Foreign Exchange

Easily navigate the complex global payments market with straightforward international payments using FX desks. Whether you're a large organisation or an SME, our partners cater for your international payment needs, help mitigate your foreign currency risk and reduce cost.

CFD/FX Liquidity

Tight liquidity in CFD and FX markets ensures that your transactions are executed rapidly and with minimal price discrepancies, offering optimal pricing and reduced slippage. Our partners have deep market depth, allowing for the execution of large orders without significant impact on the market price.

Liquidity Providers

Liquidity providers are fundamental to the functionality of modern financial markets, supporting both the operational aspects of trading platforms, cryptocurrency exchanges and market makers.

Prime Brokerage

If you're a hedge fund, institutional investor or large private investor looking for prime brokerage services, our partners can help. Consolidate various services through a single umbrella, streamline operations, reduce overhead costs, and access high-quality services.

Correspondent Banking

Our network includes reliable correspondent banking providers, helping private banks, international banks, NGOs and more gain access to international payment rails and foreign currency services.
